

ALEX MORGAN

Final-year Computer Science Student

Email: alex.morgan@example.com | GitHub: github.com/example | Location: Remote

SUMMARY

Final-year Computer Science student specialising in artificial intelligence and natural language processing. Comfortable taking a model from a notebook experiment to a deployed REST API. Looking for an AI/ML internship where I can work on real text data.

EDUCATION

B.Sc. Computer Science, Example University (2022 - 2026)

Relevant coursework: Machine Learning, Deep Learning, Natural Language Processing, Databases, Statistics, Data Structures and Algorithms.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

ML / AI: Machine Learning, Deep Learning, NLP, scikit-learn, PyTorch, Hugging Face sentence-transformers

Data: Pandas, NumPy, Matplotlib

Backend: FastAPI, REST APIs

Tools: Git, GitHub, Docker, Linux, pytest

PROJECTS

Semantic Document Search Engine

- Built a search tool that embeds documents with sentence-transformers and retrieves the closest matches using cosine similarity over a FAISS index.
- Served the model behind a FastAPI endpoint and containerised it with Docker.

Customer Review Sentiment Classifier

- Trained a text classification model on 50,000 product reviews using scikit-learn, then fine-tuned a small transformer in PyTorch for comparison.
- Ran the experiments end to end: cleaning, feature extraction, cross validation and error analysis.

Sales Data Analysis Dashboard

- Analysed three years of transaction data with Pandas and NumPy, extracted the raw data with SQL, and presented the findings as an interactive dashboard.

EXPERIENCE

Data Science Intern, Example Analytics (Summer 2025)

- Cleaned and analysed customer datasets with Python and SQL.
- Automated a weekly reporting pipeline, cutting manual work by several hours.
- Worked in a small agile team, using Git and GitHub for all code review.

CERTIFICATIONS

- Machine Learning Specialisation (online)
- Deep Learning with PyTorch (online)
